

Nuovavita

Nuovavita

La forma perfetta, quella che non ammette né principio né fine. Quella in cui non c'è più ieri destinato ad esaurirsi né domani che si converte in passato.

La nostra forma perfetta è racchiusa in 4 angoli, un quadrato nel quale ciò che esisteva, esiste ancora, assume nuova forma e funzione, guarda già al futuro.

Nuovavita è l'innovativa linea di mattonelle Grandinetti realizzate con materiale riciclato al 50% proveniente da scarti pre-consumer e post-consumer. Mirtillo, cipolla, agave, mandorla, pera, noce, castagna, melograno, sedano, olivo, melanzana. Queste le nuance.

La nostra storia si intreccia con la filosofia della sostenibilità.

Lavoriamo da sempre graniglie di marmo e di altri minerali che, grazie all'invenzione del cemento Portland, hanno permesso la creazione di splendidi pavimenti formati da piccoli frammenti, materiale di risulta dall'estrazione di blocchi dalle cave.

Oggi muoviamo da quella scoperta dell'Ottocento per vivere più in profondità la sostenibilità, per andare ancora oltre, verso una nuova vita.

The perfect shape, one that has no beginning nor end. One in which there is no yesterday to turn into nothing nor tomorrow to turn into the past. Our perfect shape is enclosed in four corners, a square in which that which existed still exists, takes on new shape and function and already looks to the future.

Nuovavita is the innovative range of Grandinetti tiles made with 50% recycled material from pre-consumer and post-consumer remnants. Mirtillo, cipolla, agave, mandorla, pera, noce, castagna, melograno, sedano, olivo, melanzana.

These are the nuances.

Our history is intertwined with the philosophy of sustainability. Since time immemorial we have transformed marble and other mineral aggregates that with the invention of Portland cement led to the creation of splendid flooring made from small fragments, waste material from the extraction of quarry blocks.

Now we have moved on from the discovery of the 1800s to experience the concept of sustainability more fully and to proceed even further towards a new life.
